

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Thevenin
Your Name Jay Shin
Your Team Member's Name Taejun Roh

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1A
 - Iteration 2B
 - Iteration 3
 - GameMechs Class
 - Food Class
 - Player Class

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1B
 - Iteration 2A
 - Iteration 3
 - objPos Class
 - objPosArrayList Class

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

I had a good experience collaborating with my partner to finish the project. I learned how to communicate effectively and divide tasks efficiently to meet our milestones. For example, having frequent communication about our project allowed me to learn and review certain parts of the code and relate back to the materials learned in the lectures. I've also realized that you can accomplish bigger, more difficult tasks by working with someone else. One challenge we faced was combining our code, which required aligning variables and ensuring all functions worked correctly before putting everything together. Overall, this project has improved my confidence in creating something in C++.
